

Camera Calibration Documentation for Close-Range Photogrammetry

This form follows the Archaeology Data Service (ADS) Guides to Good Practice.

For each camera/lens calibration:

Camera/Lens name

Date of calibration

Camera calibration
file name

Camera specifics

Array dimensions
in pixels

Array dimensions
in mm

Focal length

Principal Point

Lens distortions
(K1, K2, P1 and P2
parameters)

Affine distortions

Calibration Quality
Values

Calibration
adjustment report

For each calibration image (if performing a camera calibration with a target):

Image file names

Calibration target
description
