Control Point Documentation for Close-Range Photogrammetry

This form follows the Archaeology Data Service (ADS) Guides to Good Practice.

For each control point:

Point ID	
Source and datum (total station, GPS, etc. and WGS84, UTM, LRF)	
xyz coordinates	
xyz covariance matrix or estimated error	
Textual description of location	
Image name with control point location indicated	
Geometric constraints on reference features or control	
Coordinate System
